PROFILE

Innovative and versatile Web Developer with 5+ years of proven expertise in building responsive, scalable, and high-performance web applications. With a strong foundation in frontend development and full-stack engineering, I specialize in delivering modern solutions that enhance user experience, boost site performance, and drive measurable business results.

Proficient in a wide range of technologies including HTML5, CSS3, JavaScript (ES6+), React.js, Vue.js, Node.js, PHP, Python and CMS platforms like WordPress and Shopify. I bring deep understanding of RESTful APIs, responsive design principles, and UI/UX optimization.

Whether building an e-commerce storefront, a custom CMS, or a SaaS dashboard, I focus on clean code, modular architecture, and cross-functional collaboration. My background includes agency and product environments in Masu Business Software Outsourcing and BilgeAdam Technologies giving me agility in both creative and enterprise-focused development.

2020 – 2022
Frontend Developer — Masu Business Software Outsourcing | *Ankara*

Industry: UI/UX Design, E-Commerce, Marketing Websites

Responsibilities:
- Built responsive UIs with Vue.js, HTML5, CSS3, and JavaScript (ES6+)
- Styled modern interfaces with Tailwind CSS and Sass
- Integrated Shopify storefronts and WordPress-based CMS solutions
- Improved website performance using best practices and Lighthouse audits

Achievements:
- Launched 20+ client websites, including startups and fashion retailers
- Developed a custom Vue component library reused across multiple projects
- Raised average Lighthouse performance scores from 65 to 95+

2022 – 2025
Full Stack Developer — BilgeAdam Technologies | *Istanbul*

Industry: SaaS Platforms, Digital Transformation, Business Automation

Responsibilities:
- Engineered full-stack applications using Node.js, Express.js, and PHP
- Developed user interfaces and admin panels with React.js and Tailwind CSS
- Implemented role-based authentication and multi-user dashboards
- Integrated payment systems (Iyzico, Stripe) and 3rd-party APIs
- Designed and optimized data models in MongoDB and MySQL
- Deployed builds via Vercel, Netlify, and cPanel-based hosting

Achievements:
- Launched a SaaS HR automation platform adopted by 30+ companies
- Cut backend API latency by ~40% using query optimization and caching
- Spearheaded the shift from monolith to modular microservice architecture
